“Innovation That Matters”

Uniroyal Engineered Products Sustainability Commitment

Uniroyal Engineered Products (UEP) is committed to reducing the environmental impact of our manufacturing operations and producing products with sustainability in mind. We are dedicated to manufacturing innovative vinyl-coated fabric products while operating in an environmentally and socially responsible manner. Our approach to improving sustainability is focused on People, Products and Process.

People

- Encourage and recognize employee-generated ideas to conserve energy and prevent waste.
- Promote environmental, health and safety awareness throughout the entire company.
- Continue the philosophy to reduce, reuse and recycle as part of the UEP corporate culture.

Products

- Reduce product VOC emissions
- Incorporate recycled and bio-based content
- Reduce the use of solvents in the manufacturing process
- Decrease heavy metal content

Process

- Recycle oil, metals and paper
- Reduce raw material, energy and water usage
- Expand programs to recycle scrap materials or sell them to third parties
- Recapture and recycle processing solvents during the manufacturing process

Environmental Focus

- Avoid the use of conflict minerals
- Meet automotive OEM VOC specifications where required
- Avoid HFRs (Halogenated Flame Retardants)
- Avoid PBDEs (Polybrominated Diphenyl Ethers)
- Avoid Bisphenol A (BPA)
- Avoid POPs (Persistent Organic Pollutants)
